Elaine

Please ignore my message from yesterday. I looked at my deputy submittal and am ok with it. Did make some edits to your document including flagging the potential candidate pool for proposed projects (should be checked against proposals). This info might be of interest to the panel. Also, you should have received a wetlands grants proposal from Karen Hamilton and a well construction evaluation proposal from Ayn Schmit. I think both of those could draw on the national pool. Let's touch base today if possible to firm things up for next week.

Thanks.
Sandy

Subject: SMP Proposals

Hello Sandy,

We have received quite a few proposals for the SMP pilot and they are pretty diverse as well. I was on the call today and there was discussion on whether we should roll out with Sharepoint 2010 version or wait and roll out with the Sharepoint 2013 version that is set to come out. The group was a bit split because there was some agreement that we should wait until we received the proper tech tools to effectively roll out SMP instead of using a fill in like a Lotus Notes application and/or PAVE which is a Lotus Note app. It was suggested that we present our discussion on this to Senior Management and have them make a decision.

I am also forwarding you a brief synopsis of the projects we have received so far. Should we set up a meeting with the SLT board next week so they can review?

Thank you,

Elaine M. Robles
